

NutriBOOST

NP 10:45

+ 5% S + 1% Zn + NutriBOOST technology

NutriBOOST

NEXT GENERATION MICROGRANULAR STARTER FERTILISER

- **ENHANCES NUTRIENT AVAILABILITY**
- **PROTECTS PHOSPHORUS FROM LOCK-UP**
- **OPTIMISES ROOT DEVELOPMENT**
- **CONSISTENT CROP EMERGENCE**
- **IMPROVES STRESS RESISTANCE**

NutriBOOST

NP 10:45

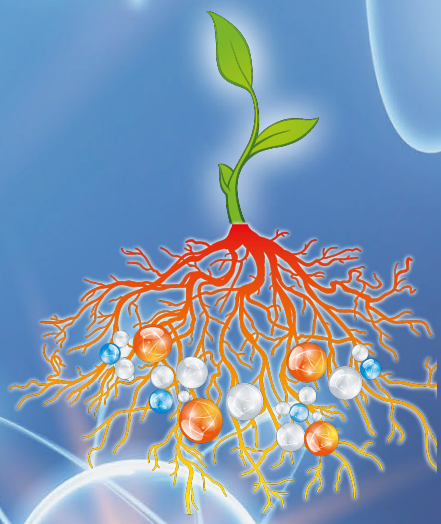

NutriBOOST is an innovative microgranular starter fertiliser specifically designed to support optimal crop development from the moment of sowing.

Formulated with advanced NutriBOOST technology, this fertiliser ensures your crops receive precisely timed nutrient availability. Its ultra-fine granules (0.5 to 1.2 mm) allow for highly accurate, localised application directly during sowing.

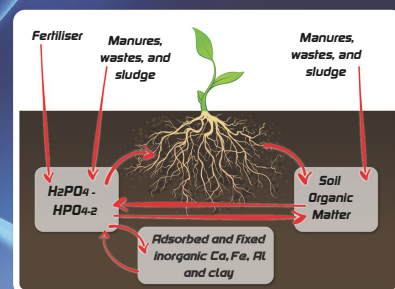

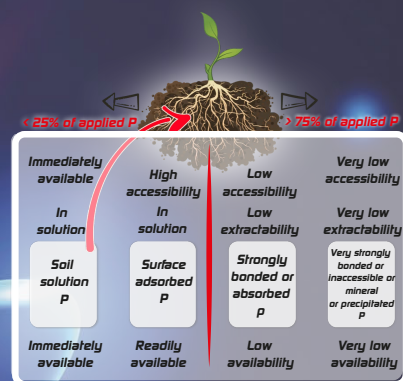

Containing a special supplement that protects phosphorus from soil lock-up regardless of soil pH, **NutriBOOST** delivers essential nutrients, including phosphorus (P) and zinc (Zn), crucial for strong root development and robust early growth in young plants.

Key Benefits:

- **Enhanced Nutrient Availability:** Contains a unique supplement that protects phosphorus from soil lock-up, ensuring maximum nutrient uptake.
- **Optimised Root Development:** High levels of phosphorus and zinc promote a deeper, more branched root system.
- **Improved Growth:** Facilitates superior early-stage growth, resulting in stronger, more resilient plants.
- **Consistent Crop Emergence:** Ensures uniform crop lines, making your crop easier to manage.
- **Higher Stress Resistance:** Strengthens plants against environmental stresses.

Total Nitrogen (N)	10%
Ammoniacal Nitrogen	10%
Phosphorus Pentoxide (P2O5) soluble in NAC (neutral ammonium citrate) and water	45%
Phosphorus Pentoxide (P2O5) soluble in water	40%
Sulphur (S) soluble in water	5%
Zinc (Zn)	1%

Application Recommendations	kg/ha
Corn	20-30
Rapeseed	20-40
Soya	20-25
Sunflower	20-25
Sugar beet	25-35
Cereals	20-40
Vegetables	25-50
